

MERIMOTE REMOTE CONTROL FOR WALL CONTROL

Multifunctional, touch-screen remote control for Q-Flow surgical lights and cameras wall control

Merimote™ is a multifunctional remote control for Q-Flow surgical lights and cameras. With its intuitive touch screen Merimote™ guides the user to get full advantage of the working environment.

Operating room staff can control surgical lights and cameras outside the sterile operating area without disturbing the operators.

Merimote benefits for the user

- Similar easy-to-use user interface as with Q-Flow
- Allows control of Q-Flow and it's camera outside the sterile area
- Wireless controls - no preinstallation required
- Possibility to control several lamp heads in the same operating room in a synchronized way
- Comfortable to use

Available for global deliveries.
